

Bill Klinten Guduru

AI Agent Developer · AI Integration Engineer · Full-Stack Engineer

Software engineer with **6+ years** at Infosys / EdgeVerve, now specialized in **production AI agents & LLM integration**. Over the past year, shipped **6 AI agents** — multi-agent RAG pipelines, autonomous QA agents, and conversational AI UX — across enterprise banking. Builds AI as an **integration layer**, with a constraint-first, structured-output discipline that keeps every response reliable.

PROFESSIONAL EXPERIENCE

- Member — UI Development

CURRENT

2024 — Present

EdgeVerve Systems Limited (an Infosys Company)

Bengaluru, India

Designed **multi-agent RAG pipelines** (DocViz AI, 5-Minute RCA Tool) on AI Canvas with Claude Sonnet 4.5 (Bedrock) + PGVector — collapsing manual, multi-step documentation and debugging workflows into automated, single-query pipelines that produce narrated explainer videos and root-cause analysis reports

Built **autonomous agents** for documentation QA (Doc Portal Reviewer Agent — Playwright + LLM validation) and Copilot usage governance (Quota Smart Copilot — a custom VS Code agent that enforces AI-spend discipline across the team without sacrificing capability)

Shipped **AI Integration UX** — a GenAI search overlay for an enterprise docs portal and the context-engineering layer behind a conversational banking UI that grounds every AI query in the user's real journey, eliminating hallucinated responses

Led UI development across enterprise banking platforms while mentoring junior developers on AI-integration and structured-output patterns

AI CanvasClaude (Bedrock)RAG / PGVectorReactNode.jsPythonTypeScript
- Product Engineer

2022 — 2024

EdgeVerve Systems Limited

Bengaluru, India

Developed and maintained enterprise product features for **Finacle banking solutions** serving 50+ banking clients across cash management, expenses, and payments modules

Built scalable UI components using Polymer.js and WaveMaker for complex financial workflows

Implemented RESTful APIs using Spring Boot and Node.js for cash management and payment processing modules, delivering features across multiple product release cycles

Collaborated with cross-functional teams across product, QA, and design for product delivery

Spring BootPolymer.jsWaveMakerLoopBackNode.js
- Senior Systems Engineer

2021 — 2022

Infosys Limited

India

Promoted from Systems Engineer for outstanding performance — took ownership of complex modules and feature development

Provided technical guidance to team members and contributed to system design and architecture decisions

JavaSpring BootJavaScriptAngular
- Systems Engineer

Dec 2019 — 2021

Infosys Limited

India

Worked on full-stack development for enterprise client projects — gained expertise in Java, Spring Boot, and front-end technologies

Delivered quality code with strong adherence to best practices across multiple project engagements

JavaSpring BootHTML/CSSJavaScript

KEY PROJECTS

DocViz AI

MULTI-AGENT RAG · VIDEO GENERATION

4-agent RAG pipeline (retriever → analyst → creative director → storyboard engineer + QA validator) that turns enterprise docs into narrated, animated explainer videos with a from-scratch client-side animation engine.

IMPACT: Won **AI Hackathon 2026 (Top 2)**; turns explainer-video production from a manual, multi-day effort into an automated pipeline

Claude Sonnet 4.5 (Bedrock)

PGVector

React/TS

Zod

5-Minute RCA Tool

AI ROOT-CAUSE ANALYSIS AGENT

Zero-dependency Python agent that matches error signatures against curated playbooks and cross-references live GitHub code search across linked repos — single-query debugging.

IMPACT: Collapses a manual, multi-repo debugging routine into a single query, surfacing root causes in minutes

Python

GitHub API

RAG

React

Doc Portal Reviewer Agent

AUTONOMOUS DOCUMENTATION QA

Autonomous agent that crawls documentation portals with Playwright, validates every checklist item with an LLM, and generates shareable HTML/JSON audit reports with confidence-scored verdicts.

IMPACT: Replaces manual page-by-page documentation review with automated, confidence-scored audits

Python

Playwright

LLM Validation

Quota Smart Copilot

AI USAGE GOVERNOR AGENT

Custom VS Code agent that classifies requests and routes to the cheapest safe model tier based on remaining Copilot budget — full agentic capability with cost discipline.

IMPACT: Enforces AI-spend discipline across the team while preserving full agentic capability

VS Code Agents

TypeScript

Copilot API

AI Doc Portal & Conversational Banking UI

GENAI UX · CONTEXT ENGINEERING

GenAI search overlay for enterprise MkDocs portal + context-engineering layer behind conversational banking UI — grounding every AI query in the user's real journey.

IMPACT: Grounds every AI query in the user's real journey, eliminating hallucinated answers in production banking flows

Vanilla JS

React/TS

MkDocs

Finacle Banking Platform

CASH MGMT · EXPENSES · PAYMENTS

Full-stack UI and APIs across three Finacle banking modules — transaction tracking, expense approval workflows, and cross-border payment processing — serving 50+ enterprise banking clients.

IMPACT: Powers core banking workflows in production across 50+ enterprise clients

Spring Boot

React

Angular

Node.js

EDUCATION

Bachelor of Technology (B.Tech)

Electrical and Electronics Engineering · 78%

Sri Krishnadevaraya University, Anantapur, Andhra Pradesh

Jun 2015 — Apr 2019

Intermediate (Class XII), MPC

Mathematics, Physics & Chemistry · CGPA 9.20

Center of Excellence, Pulivendula, Andhra Pradesh

2013 — 2015

AWARDS & RECOGNITION

● **AI Hackathon 2026 — Top 2** for DocViz AI (multi-agent RAG video-generation pipeline)

● **3× Kudos Awards** at EdgeVerve for impactful contributions

● **Grand Slam Award** — Product Launch category, EdgeVerve
